

Enhance the way you experience comfort.

With SmartSensor placed in multiple rooms, you can set an average temperature for your home to experience better comfort throughout.

With occupancy detection, SmartSensor can prioritize the rooms you're actually using for optimal comfort.

Master your smart home experience.

Integrates perfectly with your favorite smart home systems including Amazon Alexa, Apple HomeKit, Google Assistant, IFTTT, and Samsung SmartThings.

Amplify your voice with Alexa built-in

Use Alexa Calling, change the temperature, and connect to other smart devices—all with the power of your voice.

Engineered for enhanced energy savings

By reducing wasted energy in your home, you could save up to 23% annually on your heating or cooling costs.*

*Compared to a hold of 72°F

Bring new meaning to having control of your home

With Alexa built-in and an intuitive mobile app, you can control your thermostat and home using your voice, phone, tablet, computer, Apple Watch, or whatever works best for you—it's that easy.

The easy way to have a lasting impact

You have the power to do your part in the fight against climate change. If all of us take one small step in the right direction and reduce our energy usage, together we can make a real difference.

ecobee | SmartThermostat Pro

with voice control

One easy install can
make all the difference.

5-year warranty with professional installation, Alexa built-in, and state-of-the-art SmartSensor included.

Here's why pros love us.

RELIABLE

No common wire? No problem. Comes with a Power Extender Kit so it doesn't rely on other equipment to charge itself.

SIMPLE

Designed for quick and easy installation—everything you need is in the box.

COMPATIBLE

Works with gas, oil, electric, and dual fuel systems. Supports conventional (2H/2C) and heat pump (4H/2C) systems; ventilator, humidifier, dehumidifier, HRV, or ERV accessories.

Works with

ecobee SmartBuildings

Here's why customers love us.

COMFORT

Includes a SmartSensor to keep important rooms comfortable by adjusting your thermostat based on occupancy and temperature.

SAVINGS

Reduces energy use and helps homeowners save up to 23%* on heating and cooling costs.

ADVANCED CONTROL

With Alexa built-in, your customers can ask to play music, hear the news, check weather, control smart home devices, and more. Plus they can control from anywhere with any iOS or Android device.

*Compared to a hold of 72°F. Learn more at ecobee.com/savings

Voice control

Adjust your volume and enable/disable the microphone.

Quick Changes

Switch easily between Home and Away modes.

ecobee

How to use your SmartThermostat with voice control.

How to adjust your Temperature Slider.

The large number is the present temperature.
The small number is your desired temperature.

1. Tap the display screen to wake your thermostat.
2. Move the slider up or down to adjust the temperature.
3. Your set temperature will appear below the main temperature display with the word "holding".

How to set up Home, Away, and Sleep mode.

1. Open the ecobee mobile app.
2. Tap "Your thermostat" along the top left of the screen.
3. Tap the main menu at the bottom left of the screen.
4. Tap "Schedule".
5. Tap the "+" sign at the top right of the screen.
6. Select a temperature range for when you're home, away, or asleep.

How to set up your SmartSensor.

On your ecobee mobile app: Tap the "+" sign > Sensor > SmartSensor.

On your SmartThermostat: Tap Main Menu > Sensors > Add Sensors > SmartSensor.

1. Tap "Let's get started".
2. Scan the QR code on the SmartSensor's pull tab with your mobile device's camera.
3. Pull the tab to pair.
4. Name your SmartSensor and tap "Save name".
5. Choose the Comfort Settings you would like your sensor to participate in.
6. Tap "Done".
